Web 2.0

- sitios web que facilitan el compartir información, la interoperabilidad, el diseño centrado en el usuario y la colaboración en la World Wide Web.
- La web 2.0 supera la observación pasiva de las páginas web, y la interación y colaboración convierte a los usuarios en generadores de contenidos.

what is avidemux?

Avidemux is a free video editor designed for simple cutting, filtering and encoding tasks. It supports many file types, including AVI, DVD compatible MPEG files, MP4 and ASF, using a variety of codecs. Tasks can be automated using projects, job queue and powerful scripting capabilities.

Avidemux is available for Linux, BSD, Mac OS X and Microsoft Windows under the GNU GPL license. The program was written from scratch by Mean, but code from other people and projects has been used as well. Patches, translations and even bug reports are always welcome.

2012-09-10: **2.6.0. OpenGl and windows**

If you get immediately a crash on windows after loading a video, make sure you disable openGL in preferences.

2012-09-06: **2.6.0. New version**

This one is a major rewrite of all the avidemux internals.
